### ORANGE COUNTY FARM BUREAU

Notes for Week Ending June 7.

This week begins the annual membership drive of the farm bureau for 1,000 men and 500 women as active supporters of the work of the Orange County Farm bureau. This past year has been a prosamong the farmers. With this stimulus, the farm bureaus were placed on a firm foundation and rapidly increasing popularity and greater support. The needs of peace require the continuation of the peaceful rest, preparing you for your work of the farmers' organization, which can now be working on a permanent program for a more prosperous agriculture and more efficient country life. The Orange County Farm bureau has the largest membership of any farm bureau in Vermont. It has adopted a permanent program through its dairy improvement project, farm management project, home economic project, and boys' and girls' club work project, which will mean more to the people of this county as time goes on and the support increases. Every farmer in the county will be sent the June number of the "Or-ange County Farm Notes," which ex-plains in detail the past, present and future work of the farm bureau. Others interested can secure the same by writing to the farm bureau office for infor-

Meetings visited the past week were North Tunbridge grange, the Farmers' Groton and passed his boyhood days in club in No. 3, Tunbridge, and the creamery meeting at Washington. At the last named meeting, V. R. Jones gave an illustrated talk on the care of cream and better handling of milk products. The hot weather of the past week made this family. subject particularly timely. Too many farmers fail to realize the importance of sending a good, clean product to the creamery if they wish to receive the garage at Woodsville, N. H. highest market price for their product. Creameries which will pay on the basis iting Mrs. Fred Hatch, his daughter, of quality will make a big step in ad- and Ralph Evans, his son. vance in improving their product, and the better dairymen will have a bigger dyke, Me., the first of the week by the incentive to furnish the best product death of her mother.

from the city markets by western butter Clark while visiting in town. unless some of the creameries make strenuous efforts to improve the quality. The first step is on the farm. It is up to the farmer to furnish a good product, and then to urge the creamery directors to pay him a higher price than fc: poor quality. Creameries which have adopted this method have made rapid improvements in the quality of product and in the price paid to the patrons.

Soft Ginger Cookies-Stir together cup sugar, I cup molasses, I cup shortening, I egg, yolk of another egg, I tablespoon vinegar, I heaping teaspoon ginger, I level teaspoon soda dissolved in a little warm water, and flour enough to make stiff. Roll, cut out the cookies, and dip the tops in the white of an egg (do not beat the white), then dip in sugar. Bake in a moderate oven and watch carefully, as they burn easily. F. Mildred Dutton,

Home Demonstration Agent. E. H. Loveland, County Agent,

### PLAINFIELD

Junior High School Notes.

The program for the 11th annual commencement exercises of Plainfield junior week, is improving. as follows: Sunday, June 15, sermon be. fore graduating class at 10:30 a. m. by Rev. A. W. Hewitt. Wednesday, June 18, the results of the sunday of the sund high school for the week of June 15 is 18, the reception given by the juniors to the seniors and friends at 8:15 p. m. Thursday, June 19, the class day exer cises on the lawn in front of the school building at 1:30 p. m. Friday, June 20, the graduating exercises of the class of 1919 at the Plainfield opera house at

Thursday, June 12, the Cabot high school baseball team played against the Plainfield junior high school at Plainfield, the score being 14 to 7 in favor of

Last week the senior English class had a debate, the subject being, "Re-solved, the United States Should Have a System of Universal Military Train-The judges were Mrs. O. L. Martin, Mrs. A. W. Hewitt and Mrs. W. E. Stoddard, who decided in favor of the negative side. The next day the members of the negative side were treated to ice cream and wafers in the home economics room by the losers.

The seniors spent June 3 in Barre for the purpose of having their class pic tures taken.

#### GRINDSTONE PRODUCTION. Almost Entire Output Contributed to

War Purposes.

To the man in the street the manufacto have little connection with war activities. During 1918, however, this industry contributed almost its entire output directly or indirected to the prosecution of the war. This output was used in the manufacture of cutlery, hardware, and tools, which were themselves used either directly as war materials or in the manufacture of war materials. Large numbers of grindstones were also used for dressing and sharpening tools in the industrial plants that made the host of articles required by military operations. The manufacture of pulpstones, which is closely related to that of grindstones, is less patently connected with the proseention of the war, but as pulpstones are used in the preparation of wood pulp, and as an adequate supply of pulp and paper was highly important, the pulpstone industry may also be regarded as having contributed its bit by maintain-

ing and increasing its volume of busi-According to the figures compiled from reports of producers to the United States geological survey, department of the interior, the total sales of these stones in 1918 amounted to 56,554 short tons, valned at \$1,262,602, a gain of 2,122 short tons, or 4 per cent, in quantity and of \$455,706, or 56 per cent, in value. The average price per short ton was \$22 in 1918, an increase of \$7 over the average in 1917. Labor shortage was the chief obstacle encountered by the quarrymen in 1918, although difficulty in obtaining fuel and supplies as well as in transportation was reported. The demand was good, and the stock of grindstones on hand at the beginning of 1918 amounted to only 4,020 short tons. Over 85 per cent of the material used in the manufacture of grindstones was sandstone quarried in Ohio, and the remainder was

sandstone quarried in Michigan and West Virginia. The pulpstone sold in 1918 from sandstone quarried in Ohio and West Virginia amounted to 8,785 tons-2,921 pieces valued at \$513,680, an increase of nearly 26 per cent in quantity and of 50 per ent in value. Owing to the shortage of labor the supply did not exceed the de-mand, and very little stock was left

#### over for 1919. All Nicely Arranged.

"Oh, yes, it's all nicely arranged, Jack has found it practically impossible to live on his income and he needs me to economize for him."

"But, my dear, you have found it impossible to dress yourself on your allowance," said her chum. "True," she admitted, "and so I need him to economize for me. It's a splendid arrangement, don't you think so?"-

Wash your white silk gloves, hosiery and lingerie in cold water and dry them in the shade and you will not find them turning yellow.

Old-Fashioned Taffy Coming Back. The old-fashioned molasses taffy was almost forgotten before we entered the war and sugar became scarce but during panied by Mrs. James Beaton and Miss the past year it has again "come into its roaster is used baste every fifteen minown." We see taffy in the candy shops, even now that sugar is no longer so scarce as it was a few months ago. But also on a trip to Burlington this week of all places the old-fashioned molasses

The making of the sweet is quite as enjoyable as eating it when made.

Molasses Taffy—2 cups molasses, 2-3 cup sugar, 3 tablespoons oleomargarine Mrs. Lytle at Youngstown, O., and Rev. or butter, 1 tablespoon vingar. Melt oleomargarine in kettle and add momer pastors of the U. P. church in South lasses and sugar. Stir until sugar is Ryegate. The primary object of the dissolved. Boil until when tried in cold trip was to attend the first meeting of the American legion at St. Louis as a vinegar just before removing from fire. water the mixture becomes brittle. Add center, and as soon as cool enough to handle pull until porous and light in color. Handle with tips of fingers and thumbs. Cut in small pieces with sharp knife.—Springfield Republican.

#### The Office Appetite.

It is seldom that one leaves an office ing exercise that lends to appetite, the had nervous strain that requires quantities of fuel or food.

manager for the office worker to serve provide appetizing foods.

Perhaps there is no more welcome meal to place before a tired mental worker at the evening dinner than a platter of savory broiled ham and a dish of creamed potatoes.

The aroma and color of a delicately broiled medium fat piece of ham is all the appetizer needed. Ham is an economy, as it saves the expense and service of a preceding appetizer. Tomatoes either fresh or stewed are the first choice of many with ham. Either spinach, cabbage or turnips make a happy combination with a ham dinner, says the Spring-field Republican.

Pineapple or date-stuffed baked apple served with marshmallow topping makes a satisfying dessert to serve at the dinner where baked or broiled ham is served

as the main course. With the less appetizing meats a first ourse consisting of an individual serving of ripe olives, a crisp bit of celery, a couple of radishes and a slice of dry sausage will create the appetite neces-sary for full enjoyment and benefit of the meal.

### Cooking Mutton and Lamb.

Before cooking, the thin, papery membrane of skin on the outer surface ture of grindstones and pulpstones seems of mutton and lamb should be removed. The "fell," as this is called, absorbs the odors of the refrigerator, carries a wooly smell and is tough

The most important thing in serving

You must have regular movements and be sure to keep out worms like stomach worms and pin worms Dr. True's Elixir is known as "The Family

Laxative and Worm Expeller." It tones up the

stomach, restores normal bowel action and throws out these parasites or Remember the name, Dr. True's Elixir. Ask grandma-she knows about Dr. True's Elixir.

Adults and children should use it. Start using Dr. True's Elixir to-day.-Adv.

mutton or lamb is to have it piping hot and to serve it on a hot platter and plates. Good roasts and good chops can be produced by anyone if they are cooked without burning and served hot. Roasting or baking any meat retains within the meat the uices and flavor

that make it most palatable. Mutton s particularly adapted to serve this way because of its delicate flavor. The prin boned) and the brisket when stuffed.

Salt and pepper are rubbed into the ful of pepper may be used. These quan tities are for an eight-pound roast. The roast should be put into a hot oven After the roast has been browned, which keeps in the juices, a cooler fire may be used. If using a gas oven or the meat lacks fat, add a little water. A general rule that will simplify judging the time is to allow 12 to 15 minutes per pound of roast after it has been allowed 15 minutes to heat through. Unless double

When cooked remove the roast, drain off the fat, add to the browned stock in the bottom of the pae four level tableby auto.

Mr. and Mrs. D. M. McKinlay went to Peacham Thursday to remain through the graduation exercises of Peacham a "candy pull," especially during the colder months.

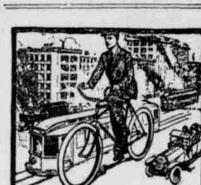

If the roast is to be stuffed, the following recipes for dressing may be used: Mashed Potato Stuffing—Two parts mashed potatoes seasoned, I part dry bread crumbs, one onion, mineed, sage. Mix thoroughly together and add milk to

moisten. Lamb Dressing-One and one-half pints stale bread crumbs, ½ teaspoon sage, 2 tablespoons butter, 1 teaspoon sweet marjoram, salt and pepper, few drops onion juice. Soak the bread crumbs in cold water. Press out nearly all the water, and add the other ingredients.

In broiling chops or steaks two things must be remembered: First, to turn the meat frequently in order to retain the juices; second, to avoid inserting a fork The best boiling is done over a fire of charcoal or wood coal, although gas or a hot coal fire produce very desirable reoccupation "ravenously hungry." While denied the cool, sharp air and quicken ed whenever broiling may be resorted to ing exercise that lends to appetite, the as frying removes the juice and flavor office worker has done mental work and from the meat. A double broiler is very convenient and avoids the use of a fork In the use of this best results are ob-It is necessary therefore for the home tained by turning every ten seconds. In using a gas oven a broiler over a pan foods in a very attractive way and to makes it possible to save the juices for gravy. After broiling, the use of a little butter improves the flavor.

Stewing or broiling may be well ap-plied to the cheaper cuts of meat. Braising, followed by the addition of cold wa ter and gentle boiling, or plunging into boiling water and keeping it hot for 15 minutes, hardens the albumen on the surface and prevents the escape of juices. After this stage the mixture should only be allowed to simmer. Hard boiling makes meat stringy and hard. If rice is cooked in the mixture it tends to improve the appearance.

Attractive flavors may be given to the nutton by the use of vegetables and perbs. Turnips, carrots, onions, sweet epper, lima beans, parsley and the herbs that flavor roasted and broiled meat of fer variety. The use of allspice will aid in seasoning. Dorothy Dexter.

### Most Useful of Them All

better way of getting about town than on a bicycle. It's no effort to pedal mile in 5 minutes. No motor trouble No cost. No waiting for trolleys. No car crowding and crushed toes. And bicycling is the greatest fun there is. Great for health-great for strength-
